

SYSTEM AND METHODS FOR APPOINTMENT RECONCILIATION

ABSTRACT OF THE DISCLOSURE

5 A system for processing multiple schedules,
constructed in accordance with the principle of the present
invention, includes an information processing system having a
memory and a processor; an input device for entering user
information; a display device for showing scheduling
10 information; an interface for sending and/or receiving
information from another source; and means for reconciling two
schedules by building synchronized lists, from which the user
may effect a reconciliation.
